

Privacy Policy

1. Introduction

This Privacy Policy explains how Packie ('we,' 'our,' or 'us') handles user data when you use our app. Our goal is to provide a seamless packing experience while ensuring user anonymity and data privacy.

2. Data Collection & Usage

We do not collect any personally identifiable information. However, certain data is stored or processed as follows:

2.1. iCloudKit & SwiftData

- Your checklists, collections, and app settings are stored locally using SwiftData and optionally synced to iCloudKit.
- You have full control over your data and can delete it via the app or your iCloud settings.

2.2. Feature Requests (Firebase)

- When you submit a feature request, it is saved in Firebase with a randomly generated UUID.
- No personal information is linked to this UUID.

2.3. In-App Purchases (RevenueCat)

- We use RevenueCat to manage subscriptions. We do not collect or store any payment information; all transactions are processed by Apple.

2.4. Analytics (Firebase)

- We collect anonymous usage data through Firebase to improve app functionality.
- This includes basic app usage patterns but does not track personally identifiable information.

3. Data Sharing & Third Parties

- We do not sell, share, or disclose any user data to third parties.
- Apple, Firebase, and RevenueCat may collect and process data per their respective privacy policies.

4. User Rights

- You can manage your iCloud data directly within your Apple ID settings.
- You may delete the app at any time, which removes all local data.

5. Changes to This Policy

We may update this policy occasionally. Any changes will be reflected in the app.

6. Contact Us
